So we took that concept a step further in v8 and applied it to all interface control elementsCommand BarThe increased use of Smaart on tablet/touch screen computers complicated using Hot-Key commands.. Multi-Window CapabilityWe have added the ability to drive multiple windows, each containing its own set of tabbed workspaces.. Improved Data Storage & APLFor static data, we have overhauled the trace storage process to allow for better direct access to your larger file structure of captured traces, without cluttering up active memory space trying to keep everything loaded in RAM in case you need it.. Broadband MeteringA long-time user requested feature is the ability to continuously view input signal levels, as well as monitor parameters such as SPL and LEQ for multiple inputs simultaneously.. Specifically:â€“ New program workflow takes you through device selection/configuration and automatically creates Spectrum measurementsâ€“ Device and measurement configuration is managed through a single windowâ€“ Input metering right in the I-O Config, check your inputs before you even create measurementsâ€“ Creating a Transfer Function measurement now automatically creates the accompanying Spectrum contributors to it.
