Great Characters with that cute Hiya! voice 3 Soothing colours 4 Smooth gameplay even on low-spec PC.. We love tinkering with interesting, useful and even weird concepts and turn the best of them into execution to create something awesome.. Okay I have been supporting this game on Greenlight from the start I would say they got the execution part of this perfect.. Also, the AI is smart enough to play the game, but not to the point of cheating hard.. There's also an easier setting if it's a little challenging for you Overall, a great game! Still looking for non-local multiplayer though :P.. Well the game is so fun when play with friends (in the same place, we can laugh together) and it's cool because it's free, BUT seriously so sad if there is NO online multiplayer for this game, I hope there is a new feature about online multiplayer, and oh ya I don't know why, whenever I chose MITO ARENA, it's broken or ya crashed.
