This movie seemed more like a commercial for CGI than anything else The CGI however was excellent (except for the last scene, I guess they ran out of money)and probably the most interesting part of the movie.. Bad acting, a confusing and altogether nonsensical story line, and most of all bad writing really killed this one for me.. 0-English DD 2 0] mkv::[DOWNLOAD LINK](#):: User Reviews:: Kurt Wimmer who wrote and directed Equilibrium, which imho is a great movie, failed miserably to repeat his former success.

The idea's behind the movie had visible potential but unfortunately the execution was extremely poor.. Ultraviolet (2006) PG-13| 88 min| Action, Horror, Sci-Fi A beautiful hemophage infected with a virus that gives her superhuman powers has to protect a boy in a futuristic world, who is thought to be carrying antigens that would destroy all hemophages.. The action which is why I saw the movie suffered from repetition: from the characters, to the setups (Violet is being attacked when she is out-numbered), to the moves, unnecessary sword fighting when they have guns with bullets, unnecessarily repetitive situations (big circle everyone attacks at once and violet wins with ease no challenging battle), and a lack of depth.
